Navigation toolbar items

The navigation toolbar contains the tools used to navigate to websites, as well as the Location bar and Search bar.

If you find that one of the items below is missing from your toolbar, see the Toolbar items missing article to restore them.

Table of Contents
- Default Navigation toolbar
- Location and Search tools
- Customizing the toolbar
- Separating or spacing the toolbar icons

Default Navigation toolbar
When you first run Firefox, the navigation toolbar contains the following items:

- **Description**
- Go back to the previous page, or forward to the next page in history
- Reload the current page if it's not loading
- Stop loading the current page while it's loading
- Open your **home page**
- Show all your bookmarks

Location and Search tools

- **Description**
- In the **Location bar**, the location of the current web page is displayed. To go to a new web page, enter a URL and press Enter.
- In the **Search bar**, you can search the Web using the search engine of your choice. To search for a new item, enter your text string in the Search bar and press Enter.

Customizing the toolbar
You can customize the navigation toolbar to add any of the following items (for more information, see [how do I customize the toolbar?](#)).

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Print current page" /></td>
<td>Print the current page</td>
</tr>
<tr>
<td><img src="image" alt="Display progress" /></td>
<td>Display the progress of current downloads through the Downloads Manager</td>
</tr>
<tr>
<td><img src="image" alt="Display your bookmarks" /></td>
<td>Display your bookmarks in the Bookmarks sidebar</td>
</tr>
<tr>
<td><img src="image" alt="Open a new browsing window" /></td>
<td>Open a new browsing window</td>
</tr>
<tr>
<td><img src="image" alt="Cut" /></td>
<td>Cut</td>
</tr>
<tr>
<td><img src="image" alt="Copy" /></td>
<td>Copy</td>
</tr>
<tr>
<td><img src="image" alt="Paste" /></td>
<td>Paste</td>
</tr>
<tr>
<td><img src="image" alt="Make the Firefox window full-screen" /></td>
<td>Make the Firefox window full-screen</td>
</tr>
<tr>
<td><img src="image" alt="Zoom out or in the current page" /></td>
<td>Zoom out or in the current page</td>
</tr>
<tr>
<td><img src="image" alt="Setup Sync or Sync now depending on your Sync connection status" /></td>
<td>Setup Sync or Sync now depending on your Sync connection status</td>
</tr>
<tr>
<td><img src="image" alt="Subscribe to a RSS feed in the current page" /></td>
<td>Subscribe to a RSS feed in the current page</td>
</tr>
<tr>
<td><img src="image" alt="Enter the Tab Groups view" /></td>
<td>Enter the Tab Groups view</td>
</tr>
</tbody>
</table>

Separating or spacing the toolbar icons
You can also add separations or spacing in the toolbar, if desired.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="A separator to add a visual separation between a group of icons" /></td>
<td>A separator to add a visual separation between a group of icons</td>
</tr>
<tr>
<td><img src="image" alt="This spacing tool adapts its width depending on the items in your Navigation bar" /></td>
<td>This spacing tool adapts its width depending on the items in your Navigation bar</td>
</tr>
</tbody>
</table>

You can define a space of a predefined width.
Displaying 1–10 of 23 search results for “website error”

How to identify whether a website problem happens only in Firefox, in every browser, or in the website itself

1. Open a new tab and check to see if you can load another website like google.com or mozilla.com.
   - If you can open another site, then **the problem only happens with certain websites**.
   - If you can’t open another site, continue on to step 2.
2. Launch another browser, like Internet Explorer, and try to open the site you were having problems with.
   - If the site works in another browser, then **the problem only happens in Firefox**.
   - If the site doesn’t work in another browser, then **the problem happens in all web browsers**.

Error loading web sites

Are you having trouble getting a website to load? Don’t worry — we’re here to help. This article will show you how to fix the problem so you can get back to surfing the web.

Firefox cannot load websites but other programs can

This article describes problems where Firefox cannot load websites, but other web browsers can. When this happens, Firefox may show a “Server Not Found” or unable to connect error message.

Cannot log in to Firefox Home App

If you’ve run into problems logging in to Firefox Home, this article will walk you through the solutions to specific error messages.

Server not found

If you have a problem connecting to a website, you may see error messages like “Server Not Found”. This article describes how to troubleshoot problems that cause this error.

This connection is untrusted

This article describes why the “This Connection is Untrusted” error message may appear when trying to visit secure (https) websites in Firefox.

Getting a 403 forbidden error on a website that I could previously access.

I have been getting a 403 forbidden error on a website that I could previously access. It always worked fine, but one day I just started getting this error message. I can access it from Safari and Chrome, but no longer from Firefox.

The Firefox Error Console shows me thousand errors

The Firefox Error Console shows me thousand errors from a large panel of websites, either that ones which are closed. How can I fix this, and make in order that the Error Console shows me only the errors for the current page? I have the latest version of FF for Mac OS X.

404 error rnpjs on google. All other websites work.

I receive 404 error rnpjs on google whenever I try to access the search page. If I inquire about the problem on another search page it sends me to the google page and I receive the same error. All other web pages can be accessed, but not google or google support. My operating system is wince pro.

Some websites' buttons or menus don't work. Error console shows a "window.open is not a function" error

I am running FF 12.0 Beta. On some websites, links, menu items and buttons do not work. I checked the Error Console and receive the same message every time.
